Il est la responsabilité de l'installateur / utilisateur de s'assurer que ce produit est chargé conformément aux spécifications.

SUPPLIED COMPONENTS

- Brackets
- Support Beam
- Camera Mounting Bracket
- Camera Mounting Plate (8" x 8" and 8" x 12")
- Camera Mounting Bracket Reinforcement
ATTACHING BRACKETS TO THE SUPPORT BEAM

1. Pass (4x) M4 x 10 hex screws through the taller flanges of the bracket and use a 2.5 mm hex key to partially screw them into M4 T-nuts (1-2 rotations only).

2. Vertically slip the T-nuts into the support beam channel and further tighten the screws so the bracket can still slide vertically along the support beam. (FIGURE A)

3. Repeat the process with the second bracket on the other side of the support beam and align both brackets so they are vertically positioned evenly along the support beam. Tighten all screws to secure your desired vertical support beam position.

**NOTE:** You may need to loosen the screws later in order to make minor adjustments.

---

**ATTACHING BRACKETS TO THE SUPPORT BEAM**

1. Pass (4x) M4 x 10 hex screws through the taller flanges of the bracket and use a 2.5 mm hex key to partially screw them into M4 T-nuts (1-2 rotations only).

2. Vertically slip the T-nuts into the support beam channel and further tighten the screws so the bracket can still slide vertically along the support beam. (FIGURE A)

3. Repeat the process with the second bracket on the other side of the support beam and align both brackets so they are vertically positioned evenly along the support beam. Tighten all screws to secure your desired vertical support beam position.

**NOTE:** You may need to loosen the screws later in order to make minor adjustments.
ATTACHING THE CAMERA MOUNTING BRACKET TO THE SUPPORT BEAM

Determine if you are going to attach the camera mounting bracket to the bottom, top, or another point along the support beam.

1. Pass (2x) M4 x 10 hex screws through the camera mounting bracket and partially screw them into the M4 T-nuts. Then, vertically slip the T-nuts into the support beam channel, position the bracket to the desired location, and tighten the screws. (FIGURE C)

ATTACHING THE CAMERA MOUNTING BRACKET REINFORCEMENT (IF APPLICABLE)

NOTE: Only install the bracket reinforcement when you attach the camera mounting bracket in the top or bottom positions on the support beam.

1. Use (2x) M6 x 12 Phil. head screws to attach the bracket reinforcement with the narrow tip toward where the stem of the bracket will be as shown. (FIGURE B)
2. Use the 10-32 x 1/2 Phil. head screw and a 10-32 hex flange nut to attach the tip of the bracket reinforcement to the stem of the camera mount. (FIGURE D)

ATTACHING CAMERA MOUNTING PLATES TO THE CAMERA BRACKET (IF APPLICABLE)

When needed, attach one of the camera mounting plates to the camera mounting bracket to accommodate larger camera footprints.

1. Pass the 4 bolts on the bottom of the camera mounting plate through slots in the desired location on the camera mounting bracket. The plate may be positioned forward and backward along the slots. (FIGURE E)

NOTE: The 8” x 12” camera mounting plate is pictured here. The procedure is the same for the 8” x 8” camera mounting plate.
ATTACHING CAMERA MOUNTING PLATES TO THE CAMERA BRACKET (CONTINUED)

2. Use a 3/8 wrench to secure (4x) 10-32 hex flange nuts on the bolts of the camera mounting plate to attach it to the camera mounting bracket in your desired position. (FIGURE F)

![FIGURE F]

NOTE: Refer to your camera’s documentation for specific mounting instructions before attempting to mount the camera to the bracket or plate.

ATTACHING BRACKETS TO THE UNIVERSAL PLATE

1. Pass (4x) M4 x 10 hex screws through the back flanges of both brackets and partially screw them into the M4 T-nuts (1-2 rotations only). (FIGURE G)

![FIGURE G]
ADJUSTING THE SUPPORT BEAM (IF NECESSARY)

1. Make adjustments on the universal plate (horizontally) or the support beam (vertically) by slightly loosening all M4 x 10 hex screws. (FIGURE J)

2. Tighten all screws after making your adjustments. Make sure all T-nuts catch properly inside the channels on both the support beam and universal plate.
INSTALLING END CAPS

NOTE:
- If you installed your camera mounting bracket to the top or bottom positions of the support beam, install a single end cap to the opposite end of the beam.
- If you installed your camera mounting bracket on any other point along the support beam, install end caps to both ends of the beam.

1. Install two plastic end cap plugs through an end cap and into the support beam as shown. (FIGURE K)

NOTE: A rubber mallet may be necessary to force the end cap plugs flush on the end caps.
